

NATEJ EL GHODBANE

Tunis, Tunisia | +216 94838676 | natej.ghodbane@esprit.tn | LinkedIn | GitHub | Portfolio

PROFILE

Second-year Computer Engineering student at ESPRIT, specializing in Data Science. Seeking a 2-month internship as a Data Scientist or AI Engineer to apply my technical skills in a professional environment.

EDUCATION

Computer Engineering Degree – Data Science Specialization 2022 – Present
Private Higher School of Engineering and Technology (ESPRIT), Tunis

Baccalaureate in Mathematics 2022
Farhat Hached Technical High School, Tunis

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java, JavaScript, C++, C, PHP
Data Science / Machine Learning: Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch, Matplotlib
Generative AI / Agents: LLMs, LangGraph, RAG, Prompt Engineering
Databases: MySQL, PostgreSQL, MongoDB, MongoDB Atlas
MLOps / DevOps: MLflow, Docker, Jenkins, Elasticsearch, Kibana, Logstash
Web / Frameworks: FastAPI, Flask, Next.js, Symfony, Streamlit
Business Intelligence: Power BI, DAX
Tools: Git, GitHub, Talend, JavaFX, FlutterFlow

PROFESSIONAL EXPERIENCE

Data Science Intern – BeeCoders June – July 2025

- Developed an assistance chatbot and a personalized recommendation system.
- Prepared and processed over 5,000 data points to improve model performance.
- Trained machine learning models and deployed a Flask application.
- Tools: Python, Pandas, NumPy, Scikit-Learn, Flask, Talend

Introductory Professional Internship – BH Bank August 2023

- Observed banking IT architecture, including systems, networks, and security.
- Gained insight into internal organization, workflows, and business procedures.

PROJECTS

Firmaa – Intelligent Agriculture Platform [Demo]

- Developed an intelligent agricultural decision-support platform integrating AI, autonomous agents, and real-time data.
- Implemented modules for smart irrigation, disease detection, livestock monitoring, and LLM-based recommendations.
- Tools: LangGraph, FastAPI, Next.js, Flutter, MongoDB Atlas, TensorFlow, LLMs

MLOps Churn Prediction Platform [GitHub]

- Developed an MLOps platform for customer churn prediction using XGBoost, FastAPI, Docker, Jenkins, and MLflow.
- Achieved an AUC-ROC score of 0.92, tracked experiments with MLflow, and monitored performance using the ELK stack.

Breast Cancer Prediction Platform [Demo]

- Developed a prediction platform with FastAPI and Next.js following the CRISP-DM methodology.
- Compared machine learning models, achieved an AUC-ROC score of 0.96, and interpreted results using SHAP.
